J. Richard Ambler collection

Dates

1956-2010

Extent

430.95 cm (14.14 linear feet) textual material, 2788 photographic images (1582 slides, 63 transparencies, 576 prints, 567 negatives), 42 maps, 5 plates, 2 signs

Biographical History

John Richard "Dick" Ambler was born on January 23, 1934, in Denver to John Vernon and Mary Louise (Sterling) Ambler. He received his bachelor's degree from the University of Colorado (1958), a master's degree from the University of Arizona (1961) and a Ph.D. from the University of Colorado, Boulder (1966).

His early career included working for the National Park Service at Mesa Verde National Park and Great Sand Dunes National Monument. He did his post-doctoral work on coastal sites in Texas for the Texas Archaeological Research Laboratory at the University of Texas at Austin.

In 1967, he joined the anthropology faculty at NAU in Flagstaff. His research interests focused on the American Southwest and became concentrated on the Colorado Plateau and Kayenta Anasazi culture, in particular. He participated in major projects, including the Glen Canyon expeditions, Navajo Mountain projects and excavations in western New Mexico. He used a multi-disciplinary approach to understanding the past, incorporating scientific standards and Native points of view.

In 1977, he authored the popular book "The Anasazi: Prehistoric People of the Four Corners Region," with photographs by Marc Gaede. His bibliography includes more than 38 professional publications, as well as volumes of unpublished work. His personal interests included pottery making, etching, pyrotechnics, travel, fiction writing, photography, carpentry, aboriginal technology, politics and helping to organize the Fort Valley volunteer fire department.

In 1985, he suffered a severe brain injury, forcing his early retirement in 1986. After his recovery, Ambler became passionate about live music and was often referred to as "Dick the Dancin' Man" in Flagstaff. As a fixture in the local community, he was voted the "Barometer of Cool" by Flagstaff Live! In 2002. He was known for his elaborate self-made jewelry and colorful shirts.

He was active in the local Libertarian party, running twice for county supervisor (1992, 2004) and was a strong proponent of medical marijuana. After retirement, he continued to remain active in the Southwestern archaeological community.

After a second traumatic brain injury in 2008, he moved to Denver to be closer to his daughters for care. Eight months after being diagnosed with a lung tumor, Ambler died peacefully on April 26, 2010 with his three living children – Kelly, Bridget and Devon – by his side.

Scope and Content

Collection consists of records related to Ambler's professional and personal life and his many activities. Predominant in the collection are records related to his many publications, particularly with relation to the Anasazi, as well as Native American perspective on prehistoric technology. Other records in the collection document the many workshops that Ambler attended and often presented at. Ambler's educational career is well-documented through a series of records related to his academic status as a student and faculty member. A sizeable correspondence series complements Ambler's many personal and professional pursuits. Also included are records related to a variety of Ambler's personal activities, including his involvement with the Libertarian party, marijuana de-criminalization, a homemade jewelry business venture, and other various community organizations. Finally, a large amount of photographic slides document many professional projects and functions, but also a number of personal and familial moments.

Conditions Governing Reproduction and Use

Unpublished materials are protected by copyright. Permission to publish, quote, or reproduce must be secured from the repository and the copyright holder.

Immediate Source of Acquisition

Collection was donated to the Museum of Northern Arizona by Kelly and Bridget Ambler, the guardians of J. Richard Ambler's estate in September 2009 (accession #4382).

Appraisal, Destruction, and Scheduling Information

A portion of the initial accession #4382 was set aside due to the belief that it was the property of Northern Arizona University and its archaeological contract division within the Department of Anthropology. These records has been processed and rehoused, and are now a part of the collection as boxes 24-42. Some disposition decisions were made in consultation with the State of Arizona Records Retention and Disposition Schedule.

Title

Series 7: Photographic Media

Dates

1958-1988

Extent

2788 photographic images (1582 slides, 63 transparencies, 576 prints, 567 negatives)

Scope and Content

Series consists of assorted photographic mediums from (mostly) professional and personal endeavors and archaeological research. Many images are related to NAU and MNA projects, while others are images used in preparation for Ambler's 1977 (and later 1987 reprinting) of his MNA publication on the Anasazi. Also included are some personal family photos.

Note

Some groupings of slides were titled, but many were stored loosely with no apparent organization.
