

# Downtown rock walk bingo

*People have built with stone for many thousands of years. Pyramids, pueblos, cathedrals and coliseums were all formed from the rocks of the region. Walking through any city or town can be a lesson in geology, as you spot examples of different types of rock and their uses.*

<b>Clay</b> 	<b>Obsidian</b> 	<b>Sculpture made from rock</b> 
<b>Sedimentary rock</b> 	<b>Shaped by natural forces</b> (ex. Hill formed by lava flow) 	<b>Igneous rock</b> 
<b>Sandstone</b> 	<b>Fossil</b> 	<b>Limestone</b> 

*These photos were taken in downtown Flagstaff, but similar examples can be found in other areas and cities. How many can you find where you are?*
